

PLD Samsung OM55N Cover

Item no.: 2293

Ceiling mount, display specific for Samsung OM55N | OM55B

PLD Samsung OM55N Cover is a ceiling mount, which is display specific developed for Samsung OM55N and OM55B screens.

The TV mount that is already included is optimized for this screen type.

The ceiling mount can be installed either in portrait or landscape format.

The swivelling of $\pm 20^\circ$ offers the possibility of optimal alignment. The height can be varied between 900 - 1600 mm (centre of screen) with tools.

The cables are routed inside the ceiling extension and are therefore hidden from view and unauthorized access. Service flaps on the back ensure convenient access.

The max. load is 60 kg.

Due to the subtle and slim design, the ceiling mount can be used in any environment.

The surfaces of the PLD Samsung OM46N Cover are finished with an impact- and scratch-resistant powder coating in black.
