

HA DH Duo L

Dual ceiling mount

Item no.: 2707

The HA DH Duo L is a ceiling mount for two screens „back-to-back“ with a screen diagonal of 55“ to 75“ | 140 - 191 cm.

The installation can be done either in landscape or portrait format.

The VESA mounts are already included and support screens with min. VESA 100 x 100 up to max. 800 x 600 mm.

The tilt angle of the TV holding fixture can be adjusted between -5° and $+30^{\circ}$ without tools, using the rotary handles on the side. The possible tilt angle depends on the size of the installed screens.

Thanks to the oblong holes on the side in the lower pipe segment, the TV holding fixture can be swiveled

by $\pm 15^{\circ}$ with tools. This means that even slight differences in the case of, for example, a faulty drilling can be compensated.

The ceiling distance can be varied in 100 mm steps between min. 938 and max. 1638 mm. This information refers to the centre of the screen.

The cables are routed internally, hidden from view and unauthorized access.

The surfaces of the HA Duo S are finished with an impact- and scratch-resistant powder coating in black.

The max. load is 2x 35 kg.

tiltable via rotary handles on the side
(no tools needed)

optionally lockable

removable spirit level included

HA DH Duo L

Dual ceiling mount

Item no.: 2707

- ceiling mount for two screens „back-to-back“
- 55 - 75" | 140 - 191 cm screen diagonal
