

CPS CEILINGMOUNT TRIANGLE

comPROnents® complete solution

Item no.: 3337

The CPS Ceilingmount Triangle is a ceilingmount for 3 screens from 46" up to 65" | 117 - 165 cm.

The screens are arranged in a triangular configuration with the arrangement with their backs to each other. The screen content is thus visible from almost any angle.

The screens can be mounted either in landscape or portrait orientation.

The VESA mounts can be fitted with a maximum of VESA 600 x 400 mm and can also be tilted from 0 - 20°.

The ceilingmount has a depth adjustment, which allows a stepless adjustment and precise alignment (Tool needed).

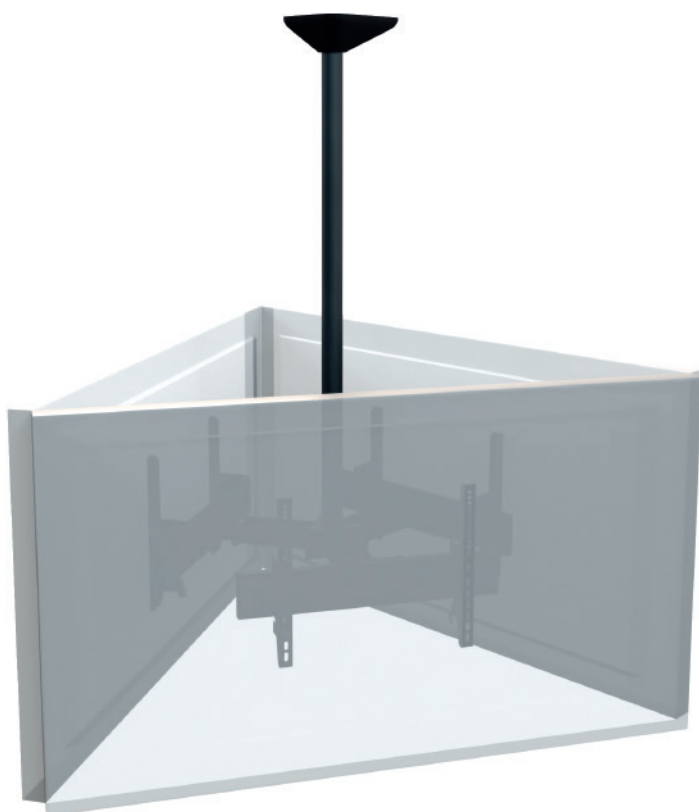

The distance to the ceiling is 1500 mm (can be shortened if necessary).

The maximum load is 40 kg / per screen.

Cables are routed internally within the tube and via cable clips on the rear of the rails.

The surfaces of the individual components are protected by an impact and scratch resistant powder coating in black.

The complete solution can be combined and extended with the components of the comPROnents® series without restriction and thus offer further application possibilities.

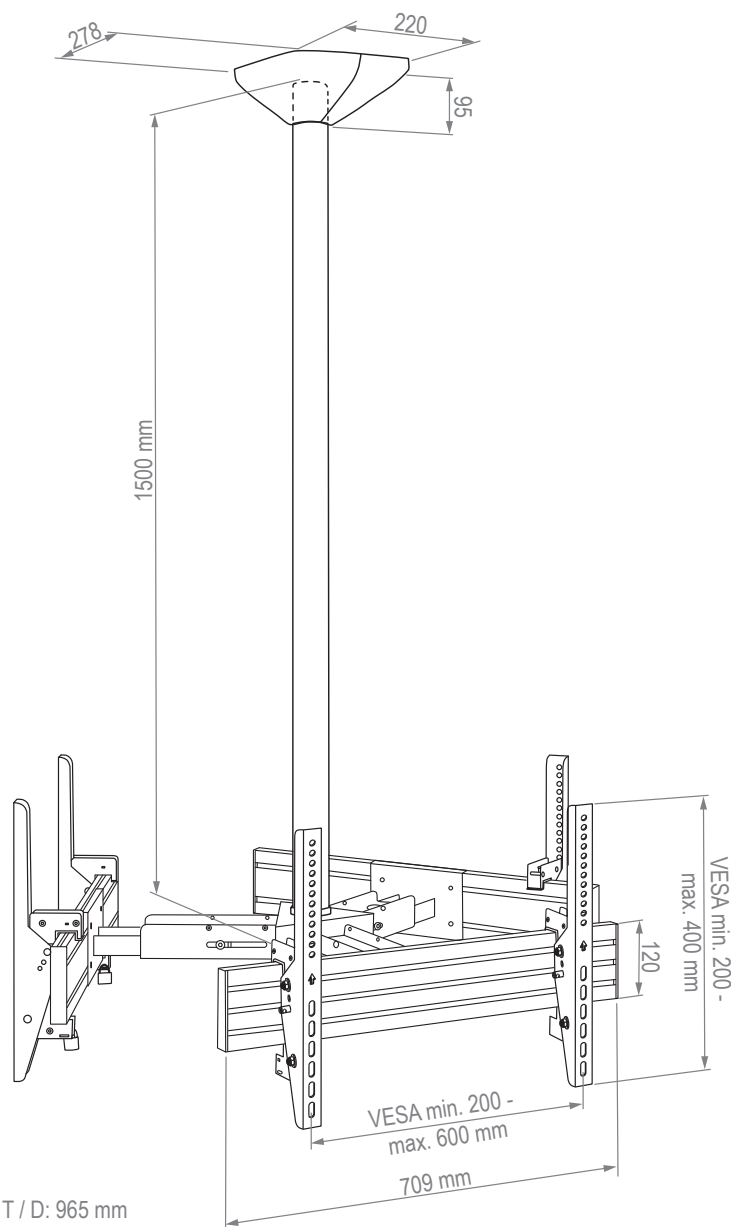

CPS CEILINGMOUNT TRIANGLE

comPROnents® complete solution

Item no.: 3337

- Ceilingmount Triangle
