

CPS Videowall C2x2 46 - 55“

comPROnents® complete solution

Item no.: 3351

The CPS Videowall C2x2 46 - 55“ is a solution for ceiling installation. It is suitable for screens with a screen size from 46 up to 55“ | 117 - 140 cm to create a video wall split 2x2 in landscape orientation.

The individual display mounts offer the possibility of level adjustment in depth and height through separate fine adjustment. In width, the screens can be easily moved and adjusted along the aluminium rails.

The included VESA mounts can be fitted with a minimum of 200 x 200 to a maximum of 600 x 400 mm.

The total width is 2009 mm; if necessary, the rail length can be shortened.

The ceiling mount has a weight compensation; different mounting points are selected depending on the weight of the screen. As a result, the screens hang straight.

The cabling is organized and securely held together within the poles and by cable clips along the rails.

The maximum load capacity is 40 kg / per screen.

The surfaces are finished with a solvent free, impact and scratch resistant powder coating in black.

The complete solutions can be combined and extended with the components of the comPROnents® series without restriction and thus offer further application possibilities.

CPS Videowall C2x2 46 - 55"

comPROnents® complete solution

Item no.: 3351

- Ceilingmount for a split 2x2 landscape
- 46 - 55" | 117 - 140 cm
