

vis-it[®] HP 55" Floorbase

Indoor totem

Item no.: 5824

The vis-it HP 55" Floorbase is an elegant indoor totem. It is suitable for digital information systems or digital signage applications and sets these aesthetically in the limelight.

The column is suitable for displays with a screen diagonal of 55" | 140 cm. The maximum installation depth of the display should not exceed 95 mm.

Ventilation slots ensure the supply and air requirements of the installed devices.

In addition, there is enough space inside for a mini PC or other smaller peripheral devices.

The cables are routed internally and are protected against unauthorized access.

The base of the totem can be installed horizontally or vertically, which enables different overall heights.

The tilt-proof stand has an adjustable levelling, whereby small unevenness in the floor can be easily compensated and a stable stand is guaranteed.

Alternatively, a „bolt-down“ version for direct screwing to the floor is also available.

vis-it[®] HP 55" Floorbase Indoor totem
