

STBW Motorized Cisco Webex Board Pro 55" display specific, lift system for floor-to-wall installation

Item no.: 5859

The STBW Motorized Cisco Webex Board Pro 55" is a height adjustable lift system for floor-to-wall installation, which has been specially designed for the Cisco Webex Board Pro 55".

The hole pattern of the lift system is designed for Cisco's collaboration room systems.

Locking screws on the screen mount secure the screen against unhooking and falling down.

The height of the screen can be adjusted electromotorically with a wired remote control. The stroke of 980 mm allows the screen height to be optimally adjusted for standing and seated viewers.

The lift system also features collision protection, which immediately stops the movement of the screen as soon as resistance is encountered.

Space saving floor-to-wall installation.

Cable management is neatly organized via a flexible cable drag chain.

The surfaces of the STBW Motorized Cisco Webex Board Pro 55" are finished with a solvent free, impact and scratch resistant powder coating in black.

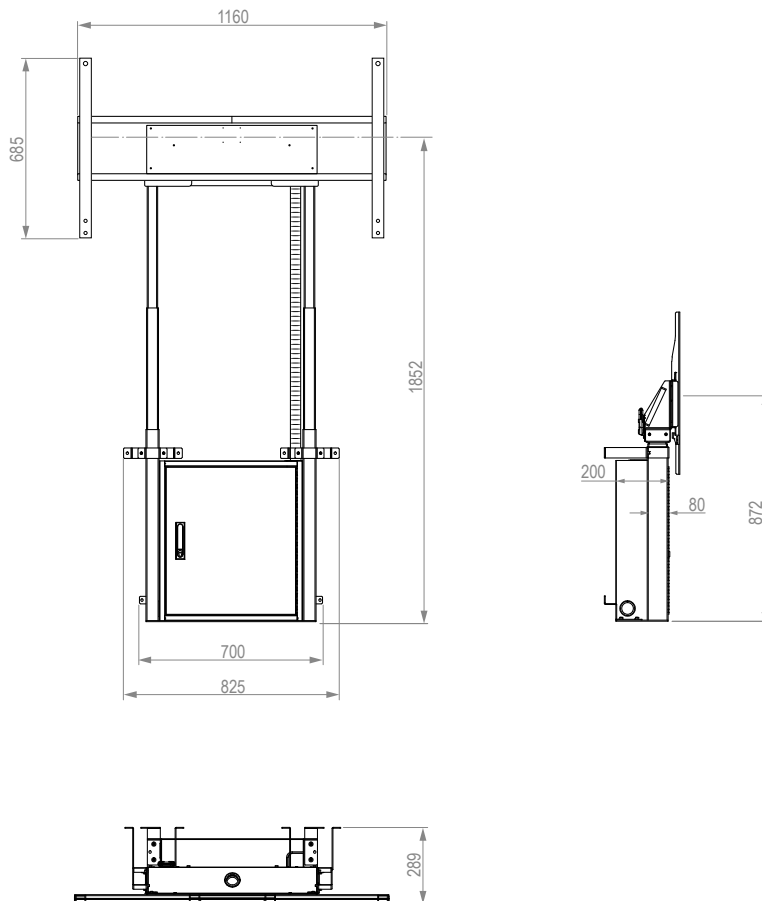

The maximum load capacity is 50 kg.

STBW Motorized Cisco Webex Board Pro 55" display specific, lift system for floor-to-wall installation

Item no.: 5859

- Lift system for floor-to-wall installation
- Display specific for Cisco Webex Board Pro 55"
- Hole pattern optimised for Cisco Webex Board Pro 55"
- Electro-motorized height adjustment with 980 mm stroke
- Wired remote control
- Collision prevention - lift stops if there is resistance
- Cable management via cable drag chain
- Lockable media cabinet, incl. multiple plug and shelf for mini-PC, e.g.: Intel NUC
- Space-saving floor-wall installation
- Dimensions: W 1160 x D 289 mm
- Safety screws - secure the screen against unhooking and falling down
- 50 kg max. load
- Solvent free, impact and scratch resistant powder coating in black
