

BL Superslim 600

Fixed wall mount

Item no.: 8403

The BL Superslim 600 is a fixed wall mount for screens with a screen diagonal between 55 and 75" (140 - 191 cm).

The VESA universal mount is compatible with screens from at least VESA 100 x 100 mm to a maximum of VESA 600 x 400 mm.

With a wall distance of just 18 mm, the BL Superslim 600 more than lives up to its name.

A subsequent height adjustment (± 8 mm) is possible

on both sides, completely independently of each other by using adjusting screws.

The fixed wall mount is available in black. The surface is finished with an impact- and scratch-resistant powder coating and is therefore particularly carefree.

The quick release device on the back via rope-drawn spring-loaded latch is invisible fixable at the mount thanks to the included magnets.

The max. load is 40 kg.

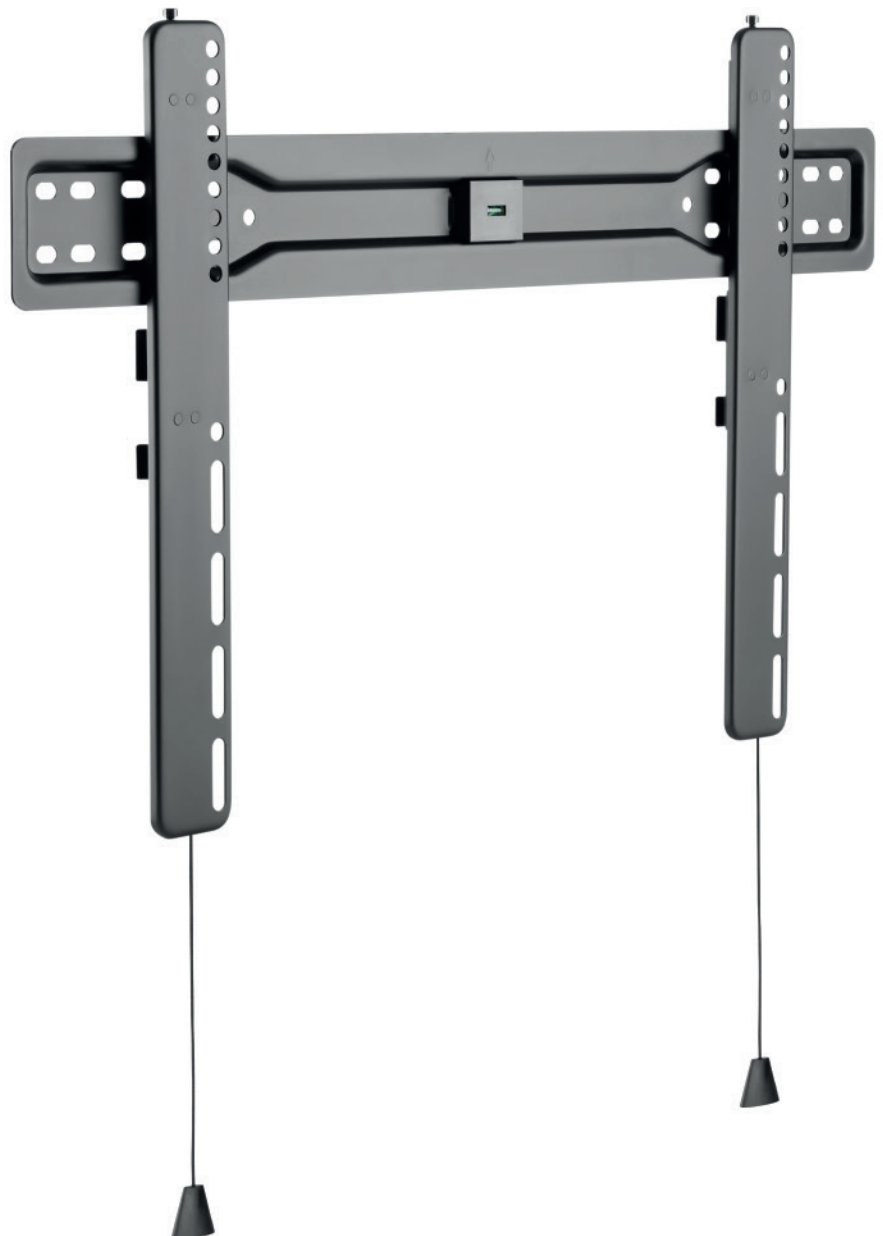

incl. spirit level for a precise alignment of the screen

release device with magnets invisibly lockable on the mount

simple release mechanism
