

HA Gasliftarm Medium Single

Fully moveable Desktop Monitor Mount

Item no.: 8715

The HA Gasliftarm Medium Single is a table mount for a monitor from 15 - 32" / 38 - 81 cm.

The construction is made of high quality, durable aluminium. Thanks to the extremely smooth-running gas springs that can be adjusted to the weight of the device, it is also fully moveable.

The monitor can be moved effortlessly, almost floating, into any desired position with just the fingertip.

The tilt angle is variably adjustable -90° / $+55^{\circ}$. In addition, the screen format can be continuously changed.

The VESA universal mount supports monitors with 75 x 75 and 100 x 100 mm.

The cables of the built-in components can be laid along the swivel arms and neatly fixed with clips.

Either clamp or screw mounting through the table top is possible (Grommet base). Both versions are included in the scope of delivery and are suitable for desktop widths between min. 10 and max. 75 mm.

The surface of the aluminium mount is finished with an impact- and scratch-resistant powder coating in grey.

variable height between 260 and 504 mm

very easy to move thanks to the gas spring hovering system

concealed cable routing along the arms, fixing via clips

HA Gasliftarm Medium Single

Fully moveable Desktop Monitor Mount
