

HA Tablet Case

Item no.: 8799

Size-adjustable protective frame for tablets

The HA Tablet Case is a size-adjustable protective frame for many commercially available tablets with a size 9.7 up to 12.9“.

Thanks to the flexibly adjustable frame elements, the mount can be adapted to different tablet sizes via tools. The maximum installation depth of the tablets can be max. 12 mm.

By fixing the frame elements via tools, the tablet is secured and can no longer be detached from the mount, which creates an anti-theft effect.

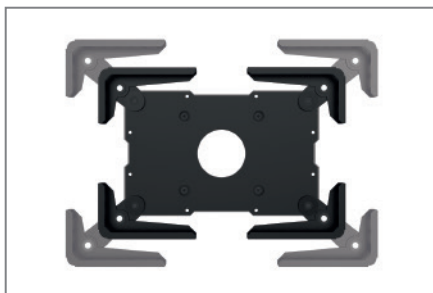

It has a VESA preparation (75 x 75 mm) on the back, which makes it easier to combine with other products.

In connection with the HA Tablet Stand (item no.: 8797) it can be used for table mounting.

In combination with the HA Tablet Wallmount (item no.: 8798), a tilting and swivelling wall mounting solution is created.

With the TSG-Stand (item no.: 2580) a free-standing stand solution is created that can be set up flexibly in the room.

The surfaces of the HA Flex-Lock Tabletstand is finished with an impact- and scratch-resistant powder coating in black.
