

HAG-BR-30 Kiosk Portrait

Fire protection totem

The HAG-BR-30 Kiosk Portrait are fire protection totems, which are suitable for the inclusion of a screen in portrait format. Three different sizes are available.

When executing the HAG-BR-30 Kiosk Portrait, the requirements of the EU directive EN 13501-1 / A1-s1, d0) are fulfilled. The protective totems are suitable for screens in escape and rescue routes with an EI30 regulation and they are also MPA tested.

Each model is supplied with 15 mm thick fire resisting glass with gel coat as well as a closed rear wall plate with cable feedthrough.

The fire protection totem series includes smoke protection with smoke protection seals as standard and a cable feedthrough through the fire protection seal.

A firmly lockable VESA universal mount is included. The VESA mount meets the VESA standard and is adapted to the respective hole pattern on the screen.

The standard housing colour is white (RAL 9010); further RAL colours are possible on request.

IMPORTANT! Please note that the fire protection pillars are not suitable for use in conjunction with high-brightness screens.

Please note! Not suitable for high-brightness screens. | Other sizes possible on request! | Technical changes reserved.

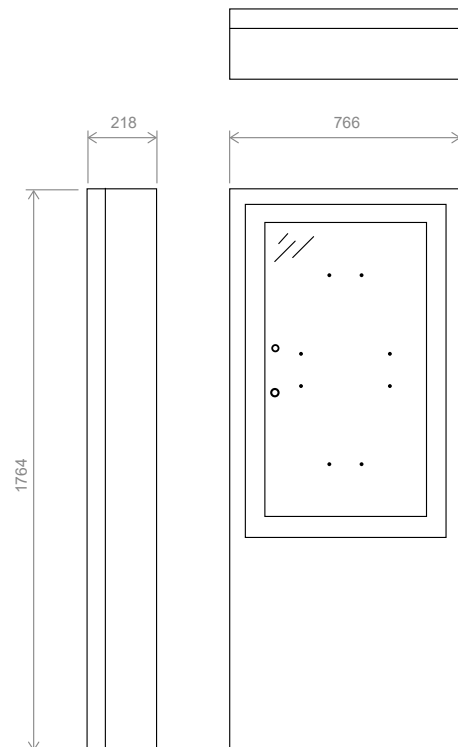

HAG-BR-30 Kiosk Portrait
