

Homefix I Superslim

Universal ceiling lift for projectors

Item no.: 1799

The Homefix I Superslim is a universal ceiling lift for projectors, which is characterized by its extremely low installation height.

Thanks to the quiet quality engine, which is „Made in Germany“ the height settings can be adjusted during an ongoing conference or presentation without disturbing.

The total height of the aluminum and steel made projector ceiling lifts is variable. The projector height plus one centimeter result in the installation height.

The lifting system offers a lifting force of 5 up to 25 kg and runs quietly and smoothly. The driveway is 500 mm max. and can be optionally expanded if required.

A mini handheld transmitter with 20 m radio range is included in the scope of delivery. If necessary, the ceiling lift can also be integrated into a multimedia control such as GIRA, KNX, LOXONE or other radio transmitters (not included).

For integrated ceiling installation a ceiling installation frame is required (Item no.: 1605).

Homefix I Superslim Universal ceiling lift for projectors

Item no.: 1799

- extremely flat projector lift
- ceiling suspension, universal use
- suitable for overhead installation for low installation height
- ceiling frame: W 635 x D 510 mm
- usable area: W 470 x D 470 mm
- space-saving belt strap guide for smooth, quiet operation
- variable height
(beamer height + 1 cm = installation height)
- lifting force from 5 up to 25 kg max.
- electrically infinitely adjustable in height
- with adjustable limit switch for entry and exit height
- Lift length up to 500 mm (optionally expandable)
- including quiet electric motor
(Made in Germany 120 W)
- maintenance free floating bearing
- made of aluminium and steel
- mini handheld transmitter with 20 m radio range
- integration into multimedia control possible
- incl. all assembly materials
