

Inbox Digital Signage

Indoor protective enclosure

Indoor protective enclosures in various sizes - optionally available with security glass in front of the screen (glass with ESG standard).

Presentation systems have a wide range of applications. A protective housing is recommended to prevent damage to sensitive media technology and also protect against theft. Screens between 32" and 65" (81 - 165 cm) can be accommodated within the Inbox Digital Signage series. Special sizes can also be considered on request.

High-quality materials and careful processing ensure a stable, precisely fitting product.

Ease of access to the built-in technology for maintenance and service was taken into account in the design, as was ventilation, a rear cable inlet or the possibility of depth adjustment of the screen.

The enclosures are powder-coated in black colour as standard - other RAL colours are available on request.

Optionally, the inbox can be equipped with 6 mm thick safety glass and / or with a holder for a mini PC.

Inbox Digital Signage
