

VWR frames for 55"

Video wall multiple frame for quick installation

No matter whether in retail, a large shopping mall, at the airport, the train station or a spacious reception area - you can find small or large video walls almost everywhere today that guide customers, travelers and visitors or provide them with information. Different requirements have to be considered for all these different locations.

With this efficient wall solution, HAGOR offers exactly the right video wall solution for every purpose. Our multiple frames are simple constructed, available in various configurations and can be installed easy and quick. The best prerequisites for creating a customized, visual highlight, which is also available at low cost.

The VWR frame 55" is suitable for screens with 55" (140 cm) and can be used very flexible. A maximum load of 30 kg can be installed, per screen.

The wall distance is only 67 mm and the depths of the screens can be finely adjusted with up to ± 4 mm.

The VESA mounting standards are supported up to VESA 600 x 400 mm max..

M6 pins are optionally available for screens with an M6- thread (Item no.: 5432).
