

## VWH-5 Heavy Duty Pop-Out Holder

**Item No: 1628**

The VWH-5 is a heavy duty full service bracket with pop-out function for screens with a size from 65 up to 105" | 165 - 267 cm to create a video wall - or especially for installation in wall recesses / pas-separtout. Please note! In the standard version, the VWH-5 is not suitable for touch applications. If a touch application is required, an adapter solution is optionally available.

The fine adjustment by a 4-point level control for depth and height enables the front edge of the screen to be adjusted to a niche, with no tools needed.

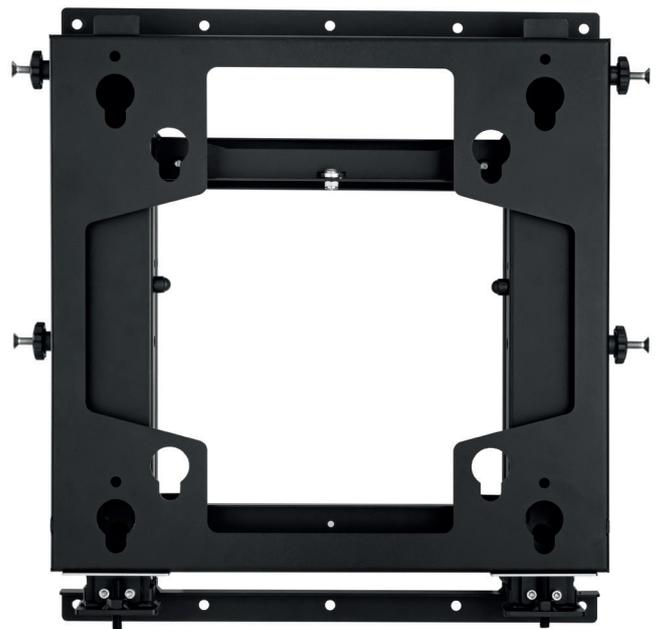

Especially with XXL monitors the installation which is precisely coordinated to the millimeter is difficult because the enormous weight despite precise planning, often causes a slight deviation in the final position.

Thanks to the fine adjustment options - especially in terms of height - the screen position can still be corrected in all levels even after it has been attached to the wall, so that the perfect image is achieved.

The innovative click-out system and the pull-out function allow simple initial installation and guarantee service access at all times during operation.

The VWH-5 includes the VESA mounting standards 300 x 300 and 400 x 400 mm. Optionally this can be adapted to any required hole pattern using a VESA adapter. The adapter increases the wall distance of the video wall mount. Additional adapters, especially for certain large screens are available on request.

The load limit is a total weight of max. 150 kg.

## VWH-5 Heavy Duty Pop-Out Holder

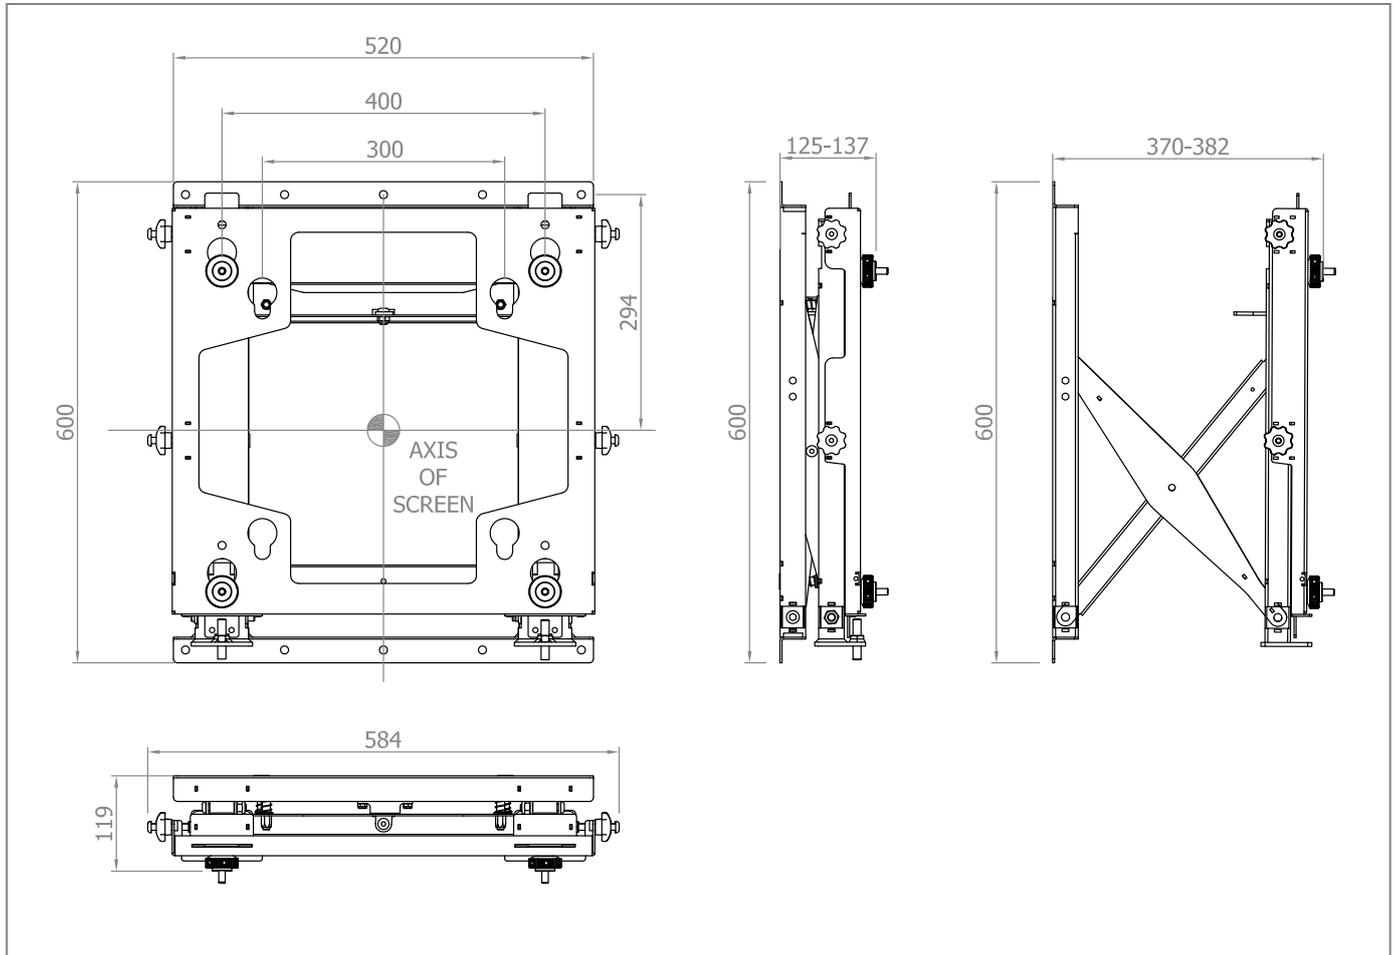

**Item No: 1628**

- for screens from 65 - 105" / 165 - 267 cm
