

STM Motorized Cisco WebEx Board 85" display-specific, mobile lift system

Item no.: 5858

The STM Motorized Cisco WebEx Board 85" is a mobile, height adjustable lift system, which has been specially designed for the Cisco WebEx Board 85".

The hole pattern of the mobile lift system is designed for Cisco's collaboration room system.

Locking screws on the screen mount secure the screen against unhooking and falling down.

The height of the screen can be adjusted electromotorically with a wired remote control. The stroke of 980 mm allows the screen height to be optimally adjusted for standing and seated viewers.

The lift system also features collision protection, which immediately stops the movement of the screen as soon as resistance is encountered.

Castors with locking brake provide mobility.

Cable management is neatly organized via a flexible cable drag chain.

The surfaces of the STM Motorized Cisco WebEx Board 85" are finished with a solvent-free, impact- and scratch-resistant powder coating in black.

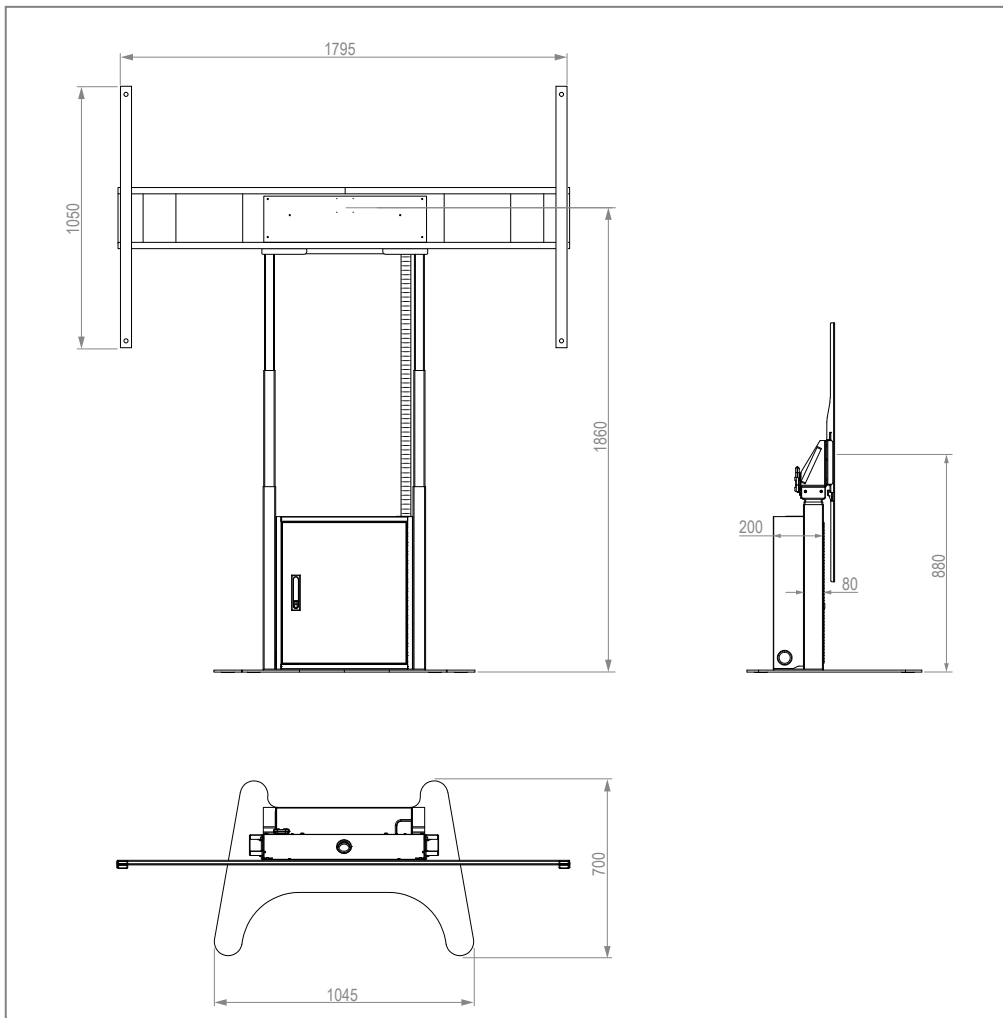

The maximum load capacity is 110 kg.

STM Motorized Cisco WebEx Board 85" display-specific, mobile lift system

Item no.: 5858

- Mobile lift system
- Display-specific for Cisco WebEx Board 85" collaboration room system
- Hole pattern optimised for Cisco WebEx Board 85"
- Electro-motorized height adjustment with 980 mm stroke
- Wired remote control
- Collision prevention - lift stops if there is resistance
- Lockable media cabinet, incl. multiple plug and shelf for mini-PC, e.g.: Intel NUC
- Cable management via cable drag chain
- Castors with locking brake
- Dimensions: W 1795 x D 794 mm
- Safety screws - secure the screen against unhooking and falling down
- 110 kg max. load
- Solvent-free, impact- and scratch-resistant powder coating in black
