

STBW Motorized Cisco WebEx Board 85" display-specific, lift system for floor-to-wall installation

Item no.: 5862

The STBW Motorized Cisco WebEx Board 85" is a height adjustable lift system for floor-to-wall installation, which has been specially designed for the Cisco WebEx Board 85".

The hole pattern of the lift system is designed for Cisco's collaboration room systems.

Locking screws on the screen mount secure the screen against unhooking and falling down.

The height of the screen can be adjusted electromotorically with a wired remote control. The stroke of 980 mm allows the screen height to be optimally adjusted for standing and seated viewers.

The lift system also features collision protection, which immediately stops the movement of the screen as soon as resistance is encountered.

Space-saving floor-to-wall installation.

Cable management is neatly organized via a flexible cable drag chain.

The surfaces of the STBW Motorized Cisco WebEx Board 85" are finished with a solvent-free, impact- and scratch-resistant powder coating in black.

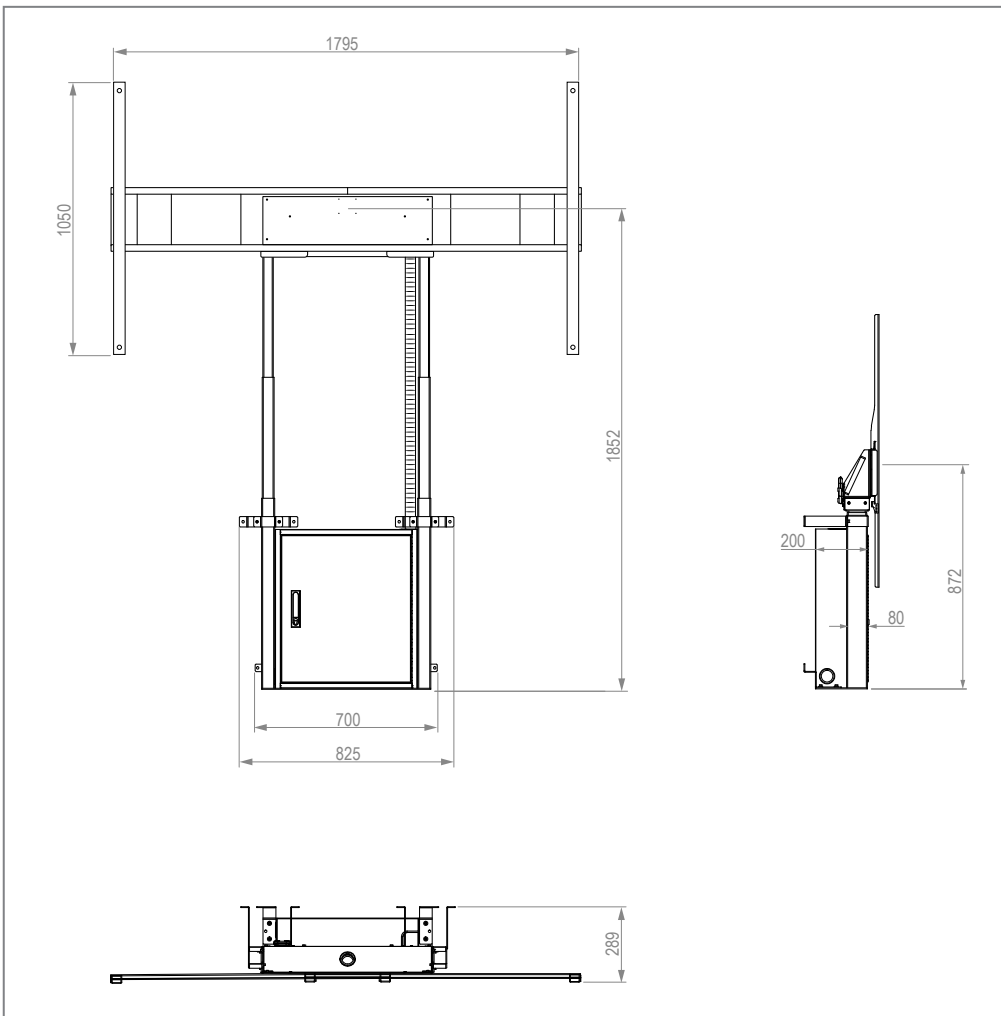

The maximum load capacity is 110 kg.

STBW Motorized Cisco WebEx Board 85" display-specific, lift system for floor-to-wall installation

Item no.: 5862

- Lift system for floor-to-wall installation
- Display-specific for Cisco WebEx Board 85" collaboration room systems
- Hole pattern optimised for Cisco WebEx Board 85"
- Electro-motorized height adjustment with 980 mm stroke
- Wired remote control
- Collision prevention - lift stops if there is resistance
- Lockable media cabinet, incl. multiple plug and shelf for mini-PC, e.g.: Intel NUC
- Cable management via cable drag chain
- Space-saving floor-wall installation
- Dimensions: W 1795 x D 289 mm
- Safety screws - secure the screen against unhooking and falling down
- 110 kg max. load
- Solvent-free, impact- and scratch-resistant powder coating in black
