

## Mobile Lift Pro Matrix

### Height adjustable lift system for a 2x2 video wall

**Item no.: 2104**

The Mobile Lift Pro Matrix is a mobile stand system with electromotive height adjustment for a 2 x 2 video wall. Screens with a diagonal between 46 - 55" | 117 - 140 cm can be used.

The VESA holders are already included and are compatible with displays with a maximum VESA of 600 x 400 mm.

The screens can be fine adjusted via adjusting screws at the VESA holders. Height, depth and width can be separately adjusted.

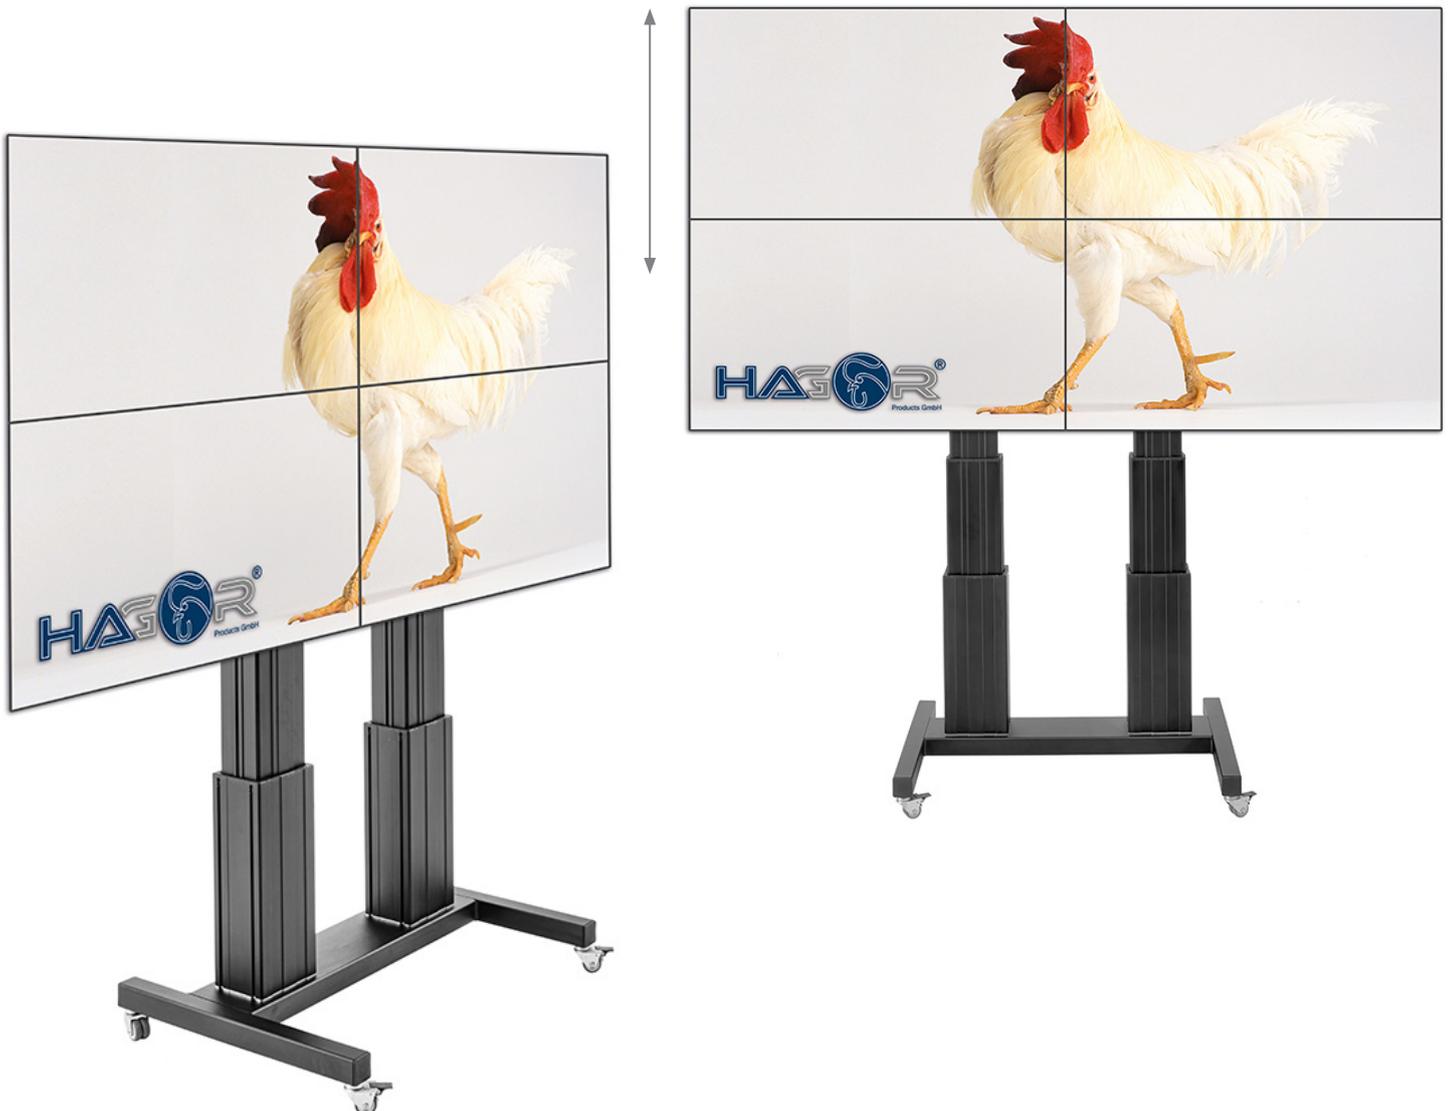

The electromotive height adjustment has a travel way of 700 mm and is set via a wired touch control.

The height of the screen rows can be adjusted via a rear frame.

The H-shaped base frame ensures stability and is equipped with lockable castors.

The surfaces of the Mobile Lift Pro Matrix are finished with an impact- and scratch-resistant powder coating in black.

The maximum load per screen is 30 kg.
