

## Wall Lift Pro Light II White

height-adjustable lift system for XXL screens

Item no.: 7801  
Version 2021

The Wall Lift Pro Light II White is a height-adjustable lift system for screens from 55 - 86" | 107 - 218 cm.

Depending on your needs, the screen can be installed in landscape or portrait format (depending on screen size!). The VESA mount includes the VESA standards up to VESA 800 x 600mm max. .

The height of the screen can be adjusted by an electric motor. The driveway of 978 mm enables the screen height to be optimally adjusted for standing or seated viewers. The start and end points can be programmed. This offers the possibility to adjust the lift to the individual needs.

Thanks to the floor-to-wall installation, the lift can be positioned directly on the wall and takes up little space.

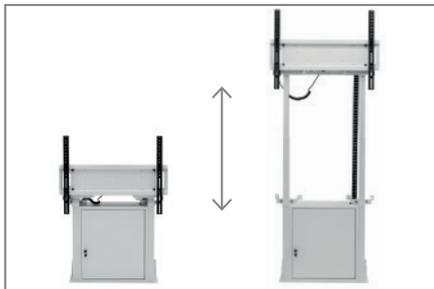

The required footprint is W 825 x 290 mm.

The Wall Lift Pro Light II White has an integrated media cabinet, which can be locked and safely protects AV equipment stored there from unauthorized access or theft.

Thanks to the maximum load of up to 120 kg the system is also suitable for large, heavy screens.

The cable management is neatly organized via an flexibly running drag chain.

A height-adjustable camera holder is optionally available - Lift Pro Light Camera Holder White.

978 mm driveway

lockable media cabinet

wired remote control
