

# HP Counterbalanced Wall

## Wall mount with manual height adjustment

**Item no.: 8409**

The HP Counterbalanced Wall is a wall mount with manual height adjustment for screens or touchscreens with a screen diagonal between 55 and 75" | 140 - 191 cm.

The manual height adjustment is carried out by a mechanism that can be adjusted to the device weight between 40 and 60 kg, which is characterized by very easy adjustability.

The screen stays safely in the desired height without any further locking. The system has a travel way of 400 mm.

The VESA universal mount is already included and covers the VESA standard from min. 200 x 200 mm up to max. 800 x 600 mm.

The surfaces of the innovative HP Counterbalances Wall are impact- and scratch-resistant powder coated and available in black.

adjustable to device mechanism

continuous height adjustment

easy installation, flat wall distance
